

A+Q

Product highlights from the A+Q Series – the Mighty & the Bright

Louder & Brighter since 1910.

Auer Signal

Series Q

the Bright

Series Q – the Bright is one of Auer Signal's most successful series of beacons. Featuring a cubic design that makes it possible to create combinations, Series Q is available in three sizes and designed for frontal and lateral signaling and use in extreme conditions (IK09).

Sizes suited for every application:
94mm, 132mm und 184mm

The Q Series is the largest and most comprehensive beacon series in three sizes with a square design. The extensive product range is available in 94 mm, 132 mm and 184 mm sizes and is available with state-of-the-art LED or xenon technology.

Beacons of the LED series boast a particularly high luminous intensity thanks to special high-power LEDs. The unique lens design gives the signal effect both frontally and laterally.

SIZE 1, 94 MM

QDS LED steady/flashing
QBS LED multi strobe
QFS Xenon strobe

SIZE 2, 132 MM

QDM LED steady/flashing
QBM LED multi strobe
QFM Xenon strobe

SIZE 3, 184 MM

QDL LED steady/flashing
QBL LED multi strobe

FEATURES

- Ideal frontal and lateral signalling effect thanks to unique lens design
- 4 strobe patterns (2 of which can be switched externally), plus steady and flashing light
- Resistant to vibrations and impact
- State-of-the-art LED technology: low power consumption, maintenance-free, long-lasting
- Can be mounted directly on walls and using brackets

Series A

the Mighty

Direct control of the stages via terminal assignment

Delivering multi-tone sirens, Series A – the Mighty has the same design as its beacon-based counterpart, Series Q, and is available in the same sizes – allowing the two series to be combined however you wish.

Series A is the largest and most comprehensive multi-tone sounder in three sizes with a square design. You will receive the series-A multi-tone sounders in sizes of 94 mm, 132 mm and 184 mm. All series A products have a high degree of protection (IP66) and, with IK09, are particularly impact-resistant and therefore vandal-proof.

FEATURES

- Up to 63 tones and 120 dB
- Direct stage switching by means of terminal assignment, without potential-free (voltage-free) switches
- Switched mode power supply for 120–240 V AC models, ensuring a wide input voltage range

SIZE 1, 94 MM

ASS-P Piezo multi-tone alarm sounder
ASS-T Multi-tone alarm sounder

SIZE 2, 132 MM

ASM Multi-tone alarm sounder
ASML Multi-tone alarm sounder black

SIZE 3, 184 MM

ASL Multi-tone alarm sounder

AW1

Stainless steel
bracket for Series A+Q

The AW1 stainless steel bracket enables conventional wall mounting for all the size 1 models in Series A/Q.

FEATURES

- Material: Stainless steel
- Laser-cut
- Dimensions: approx. 122 x 89 x 40 mm
- Suitable for all size 1 models in Series A+Q

Louder &
Brighter
since 1910.
